NOTE 1.—Under the heading “single” are included “widowed” and “divorced,” and those whose conjugal condition was unknown are included under “married.” The total number of widowed and divorced males between the ages of 20 and 45 were approximately 17,000, and of the “unknown” between the same age periods, approximately 14,000.

NOTE 2.—“Foreign-born” includes all persons not born within the British Empire, whether naturalized or not. Of the total of 286,062 foreign-born in 1911, it is estimated that about 115,000 were naturalized.

NOTE 3.—The figures of the table are those of the Census of 1911. It is estimated that the increase since 1911 in the male population of Canada, of ages 20 to 45, lies between 300,000 and 400,000. As approximately this number has been already recruited, the figures of 1911, it is thought, reflect rather closely present conditions in the Dominion as a whole, though changes have doubtless occurred in individual provinces.

June 12, 1917.

R. H. COATS,

Dominion Statistician and Controller of Census.
